

# PUMAI PUKJIT

ERP Application Support | Target Role: SAP Functional Consultant (MM)

Bangkok, Thailand | [Pumai.p@gmail.com](mailto:Pumai.p@gmail.com) | +99969509998 | Portfolio: <https://pumai-p.github.io/erp/>

---

## PROFESSIONAL SUMMARY

ERP professional with 3.5 years of experience supporting manufacturing processes, from procurement and inventory management to production and cost accounting. Experienced in business process analysis, functional solution design, and ERP customization. Currently pursuing SAP S/4HANA (MM).

## CORE COMPETENCIES

### ERP Functional

- Business Process Analysis
- Functional Solution Design
- Requirements Gathering

### Business Process

- Procure-to-Pay (P2P)
- SCM
- Inventory Management

### Technical

- Epicor Kinetic (Cloud)
- Workflow Automation (BPM)
- Report Development (SSRS)

## PROFESSIONAL EXPERIENCE

**Prime Products Industry Co., Ltd.** | *IT Project Coordinator* | Dec 2022 – Apr 2024

- Supported ERP implementation projects through User Acceptance Testing (UAT), go-live activities, and post-go-live issue handling.

**Prime Products Industry Co., Ltd.** | *ERP Application Support* | May 2024 – Present

- Supported 150+ users across two manufacturing plants by investigating 300+ ERP support cases annually and delivering over 50 ERP enhancements, customizations, and functional solutions aligned with business requirements.
- Worked closely with business users and the ERP vendor to translate business requirements into functional specifications and system enhancements.

## KEY ERP PROJECTS

### Raw Material Valuation & Cost Allocation

- Designed a raw material valuation solution that automatically recalculated material costs after quality inspection and transportation, ensuring inventory and production costs reflected actual purchase costs without month-end manual adjustments.
- Translated business requirements into functional specifications and coordinated implementation with business users, the development vendor, and Epicor.

### OEM Manufacturing Process Optimization

- Redesigned the semi-finished production process by using co-products to separate raw material components before production, enabling detailed **material breakdown** and **flexible cost allocation** beyond standard ERP capabilities.

### Cost Analysis Reporting Solution

- Designed a cost reporting solution that transformed ERP transaction data into business costing structures, **eliminating manual EY costing preparation** and enabling direct comparison between planned and actual costs.

## EDUCATION & CERTIFICATIONS:

Bachelor of Arts in Sociology and Anthropology, Kasetsart University, 2020
